Subject Index to Volume 27

Acetate inhibition, of *Pseudomonas putida*, 1362
Acetone–butanol fermentation, agitation and pressure effects on, 852, 1297
Acetyl-group hydrolysis, in acid hydrolysis of paper birch, 355
Acid-generating immobilized enzymic reactions, facilitation of proton transport in, 807
Acinetobacter calcoaceticus, utilization of short chain monocarboxylic acids by, 129
Actinomycetes, mesophilic, cellulase production by, 1367
Activated sludge, effect of feast/famine growth environments on, 562
Adhesion, immobilization of *Saccharomyces cerevisiae* by, 217
Affinity chromatography
—, for lymphocyte separation, 603
—, semicontinuous operation of, 1477
Aflatoxin, yield in *Aspergillus parasiticus*, 1577(C)
Agricultural residues, delignification of by alkaline peroxide, 225
Air-lift contactors, gas holdup and oxygen transfer in, 369
Air-lift fermentor
—, cellulase production by *Aspergillus fumigatus* in, 1166
—, with contaminated gas distributor, gas holdup in 1092(C)
Al ions, treatment of *Saccharomyces cerevisiae* by, 217
Alcalase, hydrolysis of lean meat protein by, 861
Alcohol fermentation
—, ethanol inhibition in, 280
—, in rotating biological surface (RBS) reactor, 761
Aldehyde oxidase, rabbit liver, purification and immobilization of, 447
Algae
—, biomass production, stimulation of by geothermal water, 1063(C)
—, culture of, in fertilizer–tap water, 1572(C)
—, photosynthetic cultures, bioenergetics of, 555
Alkaline peroxide delignification, of agricultural residues, 225, 1073(C)
Alkaline treatment of wheat straw, 334, 345
Amides, hydratation of nitriles to, 1581(C)
Ammonium, control of concentration, in fermentations of *Escherichia coli*, 818
Ampicillin, effects on *Escherichia coli*, 1490(C)
α-Amylase
—, purification of, hydrophobic chromatography in, 514
—, synergistic action of, on hydrolysis of starch, 260
Anaerobic digestion
—, of biomass particulates, 638
—, carbohydrate degradation and rate-limiting step in, 1482
—, thermophilic, of high strength wastewaters, 1374
—, thermophilic, in upflow anaerobic sludge blanket reactors, 1603(C)
Anaerobic downflow stationary fixed film (DSFF) reactors, 10
—, inoculation, 13, 14
—, mixing analysis at steady state, 16
—, organic overloading, stability and performance during, 86
—, startup of, 1152
Anaerobic growth of *Escherichia coli* cell, 1027
Anaerobic sludge bed reactor, upflow, 1411
Aromatic compounds, effects on hemicellulose-degrading enzymes in *Aspergillus japonicus*, 1095
Arthrobacter simplex, pseudo-crystallofermentation of hydrocortisone by, 253
D-Arylglycines, optically active preparation of using immobilized subtilisins, 420
Aspergillus fumigatus, cellulase production by in agitated vessels vs. air-lift fermentor, 1166
Aspergillus japonicus, effect of aromatic compounds on hemicellulose-degrading enzymes in, 1095
Aspergillus niger
—, cellobiase components of, for cellobiase hydrolysis, 463
—, purification of endo-xylanase from, 525, 533, 539
Aspergillus parasiticus
—, hydroxylation of biphenyl by, 1395
—, pellet size and aflatoxin yield in, 1577(C)
Aspergillus wentii, with *Trichoderma reesei*, cellulase and hemicellulase production by, 1353
ATP bioluminescent determination, with collagen-bound luciferase, 232
Aureobasidium pullulans, synthesis of pullulan by, 1516(C)
Azotobacter vinelandii, critical oxygen concentration for, 151

Bacillus amyloliquefaciens, protein release from, 887(C)
Bacillus stearothermophilus
—, continuous culture of, 721
—, immobilization of enzymes and cells of, graft copolymer as support for, 579
Bacterial activity test, 12
Bacterial adsorption, 1662
Bacterial electrode, for determination of monomethyl sulfate, 897(C)
Bacteroides cellulosolvens, conversion of cellulose to sugars by, 980
Baker's yeast
—, continuous culture, on-line optimization, 1236
—, control for fed-batch culture of, 756, 1675
Biocatalysis, multiphase, organic solvent in, 1258
Biocatalysts, immobilized, production of, 870
Biochemical cyclic reaction systems, kinetic characteristics of, 132
Biodegradation, measurement and microbiological basis of, 660
Bioengineering models, use of fuzzy mathematics in, 1146
Biofilm, acetate-grown, use of halogenated compounds by, 1564
Biofilm control, sand administration for, 117
Biofilm formation, by *Pelobacter acidigallici*, 296
Biofilm process, mathematical simulation of, 921
Biogas production, using water hyacinth, 905(C)
Biological treatment model, multispecies, 490
Biomass particulates, anaerobic digestion of, 638
Bioreactor
—, hollow-fiber, for cultivation of *Streptomyces aureofaciens*, 1012
—, with knitted superfine filaments (SFF), 1077(C)
—, noninferior periodic operation of, 1214
—, packed cell, filament formation by *Zymomonas mobilis* during ethanol fermentation in, 626
Bioreactor oxygen transport, measurement by microbial culture with oxygen-sensitive product distribution, 482
Biphenyl, hydroxylation of by *Aspergillus parasiticus*, 1395
Botryococcus braunii, hydrocarbon production by, 286
Butanediol and mixed-acid fermentations, equations for, 50

Calcium alginate gel, entrapment of concanavalin A–glycoenzyme in, 1102
Calcium alginate/magnetite spheres, dried, as support for chromatic separations and enzyme immobilization, 137
Carbohydrate degradation, in anaerobic digestion, 1482
Carbon conversion efficiency, correlation with formate utilization, 1599(C)
Carbon oxidation, in RuMP-type methylotrophs, 1623
Carboxymethylcellulose, initial rate of hydrolysis of, 409
Carboxypeptidase A, immobilization of, on styrene-malic anhydride, 675
κ-Carrageenan, cell immobilization in for ethanol production, 1652
Cassava starch, raw, ethanol fermentation of with *Rhizopus* koji, 1270(C)
Cellobiose
—, ethanol fermentation from by *Kluyveromyces cellobiovirus*, 509
—, induction of cellulases in *Chaetomium cellulolyticum* by, 1389(C)
Cellobiose hydrolysis, cellobiase components from *Trichoderma reesei* and *Aspergillus niger* for, 463
Cellodextrins, fermentation to ethanol, 1085(C)
Cells, modeling of, 1
Cellulase
—, induction of, in *Chaetomium cellulolyticum*, by cellobiose, 1389(C)
—, partitioning of, from *Trichoderma reesei*, 1036
—, production by *Aspergillus fumigatus* in agitated vessels vs. air-lift fermentor, 1166
—, production by mesophylic actinomycetes on bagasse, 1367
—, production by solid state culture system, 1445
—, production by *Trichoderma harzianum*, effect of fermentation conditions on, 1385(C)
—, production by *Trichoderma reesei* and *Aspergillus wentii*, 1353
Cellulolytic enzymes, production of, 456
Cellulomonas, fed-batch cultivation of on sugarcane bagasse pith, 121
Cellulose
—, acid hydrolysis of, ethanol fermentation in, 308
—, conversion to sugars by *Bacteroides cellulosolvens*, 980
—, degradation, relationship of fine structure to, 1540

—, degradation, use of microcalorimeter to study, 1005
—, enzymatic hydrolysis of, 177, 1282
—, enzymatic hydrolysis of in aqueous two-phase systems, 1036, 1044
—, enzymatic hydrolysis of, cellulose–cellulase adsorption in, 1056(C)
—, enzymatic hydrolysis of, pore size in, 1427
—, enzymatic saccharification of, effect of ethanol on, 389
—, recrystallization behavior of, 177
Cellulose–cellulose adsorption, 1056(C)
Cephalexin, enzymatic synthesis of from *Xanthomonas citri*, 953
CFSTR, simulation of through model for anaerobic growth of *Escherichia coli*, 1051
Chaetomium cellulolyticum, induction of cellulases in, 1389(C)
Chemostat, dynamics of, 1525
Chitin, hydrolysis in chitinase production, 769, 776
Chitinase production, chitin hydrolysis in, 769, 776
Chromatic separations, dried calcium alginate/magnetite as support for, 137
Chromatography, affinity, 603, 1477
Chromatography, gas, for on-line estimation of fermentation, 1246
Chromatography, subunit exchange, for purification of glucagon, 704
Chromogenic tripeptide substrate for assay of high-alkaline proteinase, 1717
Cibacron Blue F3G-A, preparation of, 621
Clostridium acetobutylicum, batch fermentation of, effect of pH on, 681
Clostridium butyricum, regeneration of NAD(P)H by, 1277
Clostridium thermocellum, cellulose degradation by, 1540
Coal, desulfurization of, 41
Cobalt, removed by glucans, 1115
Cometabolism, in biological oxidation of synthetic compounds, 1306
Computer-aided fermentation system, for optimizing ethanol production from whey, 547
Concanavalin A–glycoenzyme complex, entrapment in calcium alginate gel, 1102
Continuous culture of *Bacillus stearothermophilus*, 721
Continuous culture in the phauxostat, nutrient-limited, 187
Continuous stirred tank fermentor (CSTF), effect of phase-plane control on, 519
Copolymer, graft, as support in enzyme immobilization, 579
Copper, removed by glucans, 1115
Corn, enzymatic hydrolysis of, in ethanol fermentation, 321
Corn stover, chemical and enzymatic pretreatment of, for production of soluble fermentation substrates, 362
Covalent coupling of microorganisms, 632

Delignification of agricultural residues by alkaline peroxide, 225, 1073(C)
Diaphorase in malic acid production, 596
Diffusion in charged membranes, 1382(C)
Diffusion coefficient, 1533
Diffusion-limited hollow fiber reactor, 182
Digital counter, for measurement of fermentation gas, 569(C)
Dilution rate, response of nitrogen-limited chemostat culture of *E. coli B/r* to changes in, 439
Dissolved oxygen tension (DOT), control of, 1507(C)

EcoRI enzyme, fermentation of by *Escherichia coli*, 1320
Electricity production, from lignin, 972
Electrochemical pH control, 214(C)
Endo-xylanase, purification of from *Aspergillus niger*, 525, 533, 539
Enzymatic gallic acid esterification, 124
Enzyme adsorption, 961
Enzyme complex, effect of shear on, 1726(C), 1730
Enzyme deactivation, mechanism of, 877
Enzyme denaturation, 1554
Enzyme graft copolymers, temperature effects on, 1548
Enzyme immobilization
—, continuous, retrofitting batch-soluble process to, 1458
—, determination of k_m and D_e from, 883(C)
—, on dimethyl/aminated Nylon gels, 1403
—, dried calcium alginate/magnetite spheres as support for, 137
—, graft copolymers, as support in, 579
—, graft copolymers, temperature effects on, 1548
—, in porous membranes, 1126
—, thermostability in, 572
Enzyme inactivation during drying, application of simplified calculation method to, 109
Enzymes, cellulolytic, production of, 456
Enzymes, separation and purification of, 1451
Equations, fermentation, 50, 67
Errata, 1276, 1392
Escherichia coli
—, ampicillin effects on, 1490(C)
—, *B/r*, nitrogen-limited chemostat culture of, response to pH and dilution rate, 439
—, CFSTR simulation through model for anaerobic growth of, 1051
—, control of redox potential in, 1512(C)
—, critical oxygen concentration for, 151
—, fermentations, control of ammonium concentration in, 818
—, genetically modified, fermentation of EcoRI enzyme by, 1320
—, growth pattern of single cell under anaerobic conditions, 1027
—, instability of recombinant plasma pPLc23-*trpAl* in, 28
—, plasmid–host interactions, 1668
Ethanol
—, efficiency of microbial growth on, 792
—, enzymatic saccharification of cellulose, effect on, 389
—, production, cell immobilization in κ-carrageenan for, 1652
—, production, of grain sorghum, stillage recycling in, 1735
—, separation of from ethanol–water mixture, 1081(C)
—, tolerance in yeasts, extracellular acidification for testing of, 1596(C)
Ethanol fermentation
—, acid hydrolysis of cellulose for, 308
—, acid hydrolysis of sweet potato for, 308
—, from cellodextrins, 1085(C)
—, continuous, from fructose, by *Zymomonas mobilis*, 613
—, continuous, from whey permeate, 914(C)
—, enzymatic hydrolysis of corn for, 321
—, extractive, 1335
—, filament formation by *Zymomonas mobilis* during, 626
—, of raw cassava starch, with *Rhizopus* koji, in gas circulation fermentor, 1270(C)
—, solid-state, by inert gas circulation, 1312
—, solid-state, of sweet sorghum, 34, 1122
—, from whey, optimizing using computers, 547
—, from D-xylose, by *Pachysolen tannophilus*, 302
—, from D-xylose and cellobiose by *Kluyveromyces cellobiovorus*, 509
—, *Zymomonas mobilis* for, 273
—, by *Zymomonas mobilis*, mathematical model for, 984
Ethanol inhibition, in alcohol fermentation, 280
Eucalyptus wood, pretreated, enzymatic hydrolysis of, 1591(C)
Extracellular acidification, for testing of ethanol tolerance in yeasts, 1596(C)

Feast/famine growth environments, effect on activated sludge, 562
Fed-batch culture
—, of baker's yeast, control of, 756, 1675
—, *Cellulomonas*, on sugarcane bagasse pith, 121
—, mineral supplementation in, 192
Fermentation
—, acetone–butanol, 852, 1297
—, *Clostridium acetobutylicum*, effect of pH on, 681
—, continuous process analysis in, using mass spectrometer membrane probe, 238
—, of EcoRI enzyme, by *Escherichia coli*, 1320
—, *Escherichia coli*, control of ammonium concentration in, 818
—, gas chromatography and gateway sensors for on-line estimation of, 1246
—, gluconic acid, by *Gluconobacter oxydans*, 711
—, monitoring and control of, HPLC system for, 1060(C)
—, pullulan, effect of pH on, 202
—, solid culture, cellulase production in, 1445
—, solid-state, of oat straw by white-rot fungi, effect of gas environment on, 382
—, solid-state, of sweet sorghum to ethanol, 34
—, solid substrate, of wheat straw, 20, 1687
—, soluble substrates, by chemical and enzymatic pretreatment of corn stover, 263
—, verroculogen, 1586(C)
—, xylose, by *Pachysolen tannophilus*, effect of glucose supplements on, 171
Fermentation equations
—, butanediol and mixed-acid, 50
—, propionic-acid, 67
—, sugars other than glucose, 75
Fermentation gas, measurement by digital counter, 569(C)
Fermentor, continuous-flow, liquid level control in, 917(C)
Fermentor, gas circulation, ethanol fermentation of raw cassava with *Rhizopus* koji starch in, 1270(C)
Fermentor, rotary drum, for ethanol fermentation, 1122
Fermentor, tower, for induced flocculation of *Pachysolen tannophilus*, 1608(C)
Fertilizer–tap water, for algae culture, 1572(C)
Filtration probe, computer-connected, measurement of mycelial concentrations with, 729
Flocculation, induced, of *Pachysolen tannophilus*, 1608(C)
Flow swing, in hollow fiber reactor, 1185
Formate measurement, potentiometer for, 1634
Formate utilization, correlation with carbon conversion efficiency, 1599(C)
Fuel cell, for production of electricity from lignin, 972
Fumaric acid production, by *Rhizopus arrhizus*, improving rate of, 1067(C)
Fuzzy mathematics, use in bioengineering models, 1146

Gas circulation, inert, solid-state ethanol fermentation by, 1312
Gas holdup
—, with contaminated gas distributor, in air-lift fermentor, 1092(C)
—, and oxygen transfer, in airlift contactors, 369
Gateway sensors, for on-line estimation of fermentation, 1246
Geothermal water, used to stimulate algal biomass production, 1063(C)
Glucagon, purification of, by subunit exchange chromatography, 704
Glucans, for cobalt and copper removal, 1115
Glucoamylase
—, ion exchange for removal of glucosyltransferase from, 1721
—, synergistic action of, on hydrolysis of starch, 260
Gluconic acid, fermentation by *Gluconobacter oxydans*, 711

Gluconobacter oxydans, gluconic acid fermentation by, 711
Glucose
—, condensation of, into maltose and isomaltose, 498
—, influence of, on maltodextrin hydrolysis, 1274(C)
Glucose oxidase, immobilized, increasing stability of, 1619(C)
Glucose oxidase immobilization, 842
Glucose supplements, effect of, on fermentation of xylose by *Pachysolen tannophilus*, 171
β-Glucosidase, of *Penicillium funiculosum*
—, mycelial binding of, 786
—, properties of, 786
—, purification of, 781
Glucosyltransferase, removal from glucoamylase by ion exchange, 1721
Glutaraldehyde, chemical aggregation of pepsin by, 415
Glycerol, production of, by *Hansenula anomala*, 1089(C)
Grain sorghum stillage recycling, 1735
Growth and lincomycin production, in *Streptomyces lincolnensis*, effects of chemical environment on, 327
Growth studies, aerobic, microcalorimeter for, 996

HPLC system, for monitoring and control of fermentation, 1060(C)
Halogenated compounds, utilization of, by acetate-grown biofilms, 1564
Hansenula anomala, glycerol production by, 1089(C)
Hemicellulase, production by *Trichoderma reesei* and *Aspergillus wentii*, 1353
Hemicellulose-degrading enzymes, in *Aspergillus japonicus*, effect of aromatic compounds on, 1095
Hydratation, of nitriles to amides, 1581(C)
Hydrocortisone, pseudo-crystallofermentation of, by *Arthrobacter simplex*, 253
Hydrogen peroxide
—, alkaline, enhancement of polysaccharide recovery by pretreatment with, 893(C)
—, effect on enzymatic hydrolysis of rice straw of pretreatment with, 1418
Hydrogen stripping, influence on methane production, 1692
Hydrolysis
—, acid, of cellulose, ethanol fermentation in, 308
—, acid, of paper birch, xylan and acetyl-group hydrolysis in, 355
—, acid, of sweet potato, ethanol fermentation in, 316
—, of carboxymethylcellulose, initial rate of, 409
—, cellobiose, using cellobiase components from *Trichoderma reesei* and *Aspergillus niger*, 463
—, chitin, in chitinase production, 769, 776
—, enzymatic, of cellulose, 177, 1282
—, enzymatic, of cellulose, in aqueous two-phase systems, 1036, 1044
—, enzymatic, of cellulose, cellulose–cellulase adsorption in, 1056(C)
—, enzymatic, of cellulose, pore size in, 1427
—, enzymatic, of corn, ethanol fermentation in, 321
—, enzymatic, of pretreated Eucalyptus wood, 1591(C)
—, enzymatic, of rice straw, 1418
—, of lean meat protein, by alcalase, 861
—, maltodextrin, influence of glucose on, 1274(C)
—, semicontinuous, of Solka Floc BW 200, 1044
—, of starch by glucoamylase, condensation of glucose into maltose and isomaltose in, 498
—, of starch, synergistic action of α-amylase and glucoamylase on, 260
—, of sugarcane bagasse, by mycelial biomass of *Penicillium funiculosum*, 1070(C)
Hydrophobic chromatography, in purification of α-amylase, 514
Hydroxylation, of biphenyl by *Aspergillus parasiticus*, 1395

Insulin extraction, effect of ultrasound on, 1223
Intracellular equilibrium, 1520(C)
Invertase activity, of *Saccharomyces cerevisiae*, on sugar cane molasses, 1229
Ion exchange, for removal of glucosyltransferase from glucoamylase, 1721
Isomaltose, condensation of glucose into, in hydrolysis of starch by glucoamylase, 498
Isomaltulose, production of, using immobilized cells, 471

Kluyveromyces cellobiovorus, ethanol fermentation from D-xylose and cellobiose, 509
Kluveromyces fragilis, in continuous ethanol production from whey permeate, 914(C)

Lactate concentration, measurements of, 167
L-(+)-Lactate electrode, use in monitoring tissue culture medium, 837
Lactate oxidase, with electrochemical oxygen sensor, to measure lactate concentration, 167
L-Leucine, production in enzyme membrane reactor, 1616(C)
Lignin, electricity production from, 972
Lincomycin production and growth, in *Streptomyces lincolnensis*, effects of chemical environment on, 327
Liquid level, control of, in continuous-flow fermentor, 917(C)
Luciferase, collagen-bound, for ATP bioluminescent determination, 232
Lymphocytes, separation by affinity chromatography, 603

Macromoleclar impregnation in porous supports, restricted diffusion effects on, 208
Malic acid production, by electrochemical reduction, 596
Maltodextrin hydrolysis, influence of glucose on, 1274(C)
Maltose, condensation of glucose into, in hydrolysis of starch by glucoamylase, 498
Mammalian cell cultivation, on microcarriers, inoculum requirement for, 585
Mass spectrometer, with membrane probe, for continuous fermentation analysis, 238
Mean cell residence time, calculation of, for unsteady-state sludge systems, 695
Membranes, charged, diffusivities in, 1382(C)
Methane production
—, by fixed-film reactors, from dairy manure, 266
—, influence of hydrogen stripping on, 1692
Methanification, microbial, 1192, 1199
Methanol, efficiency of microbial growth on, 792
Methylotrophs, RuMP-type, carbon oxidation in, 1623
Methylviologen, in malic acid production, 596
Microbial growth, a cybernetic view of, 1
Microbial growth on methanol and ethanol, efficiency of, 792
Microbial toxicity monitor (MTM), 1500(C)
Microcalorimeter
—, for aerobic growth studies, 996
—, use in study of cellulose degradation, 1005
Microcapsules, semipermeable, as bioartificial pancreas, 146
Microcarriers
—, inoculum requirement for cell cultivation on, 585
—, serial propagation of cells on, 1466
Mineral supplementation in fed-batch culture, 192
Mixotrophic growth, 1640
Monocarboxylic acids, short chain, utilization of, by *Acinetobacter calcoaceticus*, 129
Monomethyl sulfate, determination of, by bacterial electrode, 897(C)
Mycelial concentrations, computer-connected filtration probe for measuring, 729

NAD(P)H, regeneration of, by *Clostridium butyricum*, 1277
Nitriles, hydratation to amides, 1581(C)
Nylon gels, dimethyl-aminated, enzyme immobilization on, 1403

Oat straw, effect of gas environment on solid-state fermentation of, by white-rot fungi, 382
Oil degradation, 94
On-line estimation
—, of fermentations, gas chromatography and gateway sensors for, 1246
—, of rate of photosynthesis, 1136
On-line optimization, of continuous Baker's yeast culture, 1236
Organic solvent, optimization of, in multiphase biocatalysis, 1258
Oxygen concentration
—, critical, for *Azotobacter vinelandii*, 151
—, critical, for *E. coli*, 151
—, low dissolved, system for control of, 151
Oxygen diffusion coefficient, measuring with polarographic oxygen electrodes, 1495(C)
Oxygen transfer
—, and gas holdup, in airlift contactors, 369
—, in liquids, 503
Oxygen transport, bioreactor, measurement by microbial culture with oxygen-sensitive product distribution, 482
Oxytetracycline biosynthesis, scale-down experiments, 398

pH
—, effect on batch fermentation of *Clostridium acetobutylicum*, 681
—, effect on batch fermentation of pullulan from sucrose medium, 202
—, response of nitrogen-limited chemostat culture of *E. coli B/r* to changes in, 439
—, of *Saccharomyces cerevisiae* batch cultures, control of, 214(C)
pH-parametric pumping, continuous, separation and purification of enzymes by, 1451
Pachysolen tannophilus
—, fermentation of D-xylose to ethanol in, 302
—, induced flocculation of, 1608(C)
—, induction of xylose reductase in, 1739(C)
Pancreas, bioartificial, semipermeable microcapsules as, 146
Paper birch, acid hydrolysis of, xylan and acetyl-group hydrolysis in, 355
Pelobacter acidigallici, biofilm formation, 296
Penicillium funiculosum
—, β-glucosidase of, properties and mycelial binding of, 786
—, β-glucosidase of, purification of, 781
—, hydrolysis of sugarcane bagasse by mycelial biomass of, 1070(C)
—, mutant for saccharification of straw, 81
Pepsin, immobilization of, by chemical aggregation by glutaraldehyde, 415
Phase-plane control, effect on continuous stirred tank fermentor (CSTF), 519
Phauxostat, nutrient-limited continuous culture in, 187
Phosphatase, immobilized, for preparative resolution of D, L-threonine, 247
Phosphate, effect on estimation of reducing sugars, 1612(C)
5′-Phosphodiesterase, intracellularly stored, release of, 890(C)

Photoheterotrophic growth, 1640
Photosynthesis, on-line estimation of rate, 1136
Plasmid content
—, growth rate of cells affected by, 162
—, recombinant, interactions with host, 1668
—, single-cell distribution in steady-state balanced growth, 157
—, in unstable binary fission recombinant organisms, 156
Polysaccharide recovery, enhancement with alkaline hydrogen peroxide, 893(C)
Pore size, as factor in enzymatic hydrolysis of cellulose, 1427
Porous supports, restricted diffusion effects on macromolecule impregnation in, 208
Primary particle, formation in protein precipitation, 1434
Product formation, in unstable recombinant populations, 1699
Propionic-acid bacteria, fermentation equations for, 67
Protein hydrolysis, of lean meat by alcalase, 861
Protein precipitation, primary particle formation in, 1434
Protein release, from *Bacillus amyloliquefaciens*, 887(C)
Proteinase, high-alkaline, assay with chromogenic tripeptide substrate, 1717
Proton transport, facilitation of, in acid-generating immobilized enzymic reactions, 807
Pseudo-crystallofermentation, of hydrocortisone by *Arthrobacter simplex*, 253
Pseudomonas putida
—, acetate inhibition of, 1362
—, sand used for control of, 117
Pullulan
—, effect of pH on batch fermentation of, 202
—, synthesis from yeast-like *Aureobasidium pullulans*, 1516(C)
Pyritic sulfur, biological removal from coal, 41

Radial flow cells, 434
Rate-limiting step, in anaerobic digestion, 1482
Reactor, anaerobic downflow stationary fixed film (DSFF), 10
—, inoculation, 13, 14
—, mixing analysis at steady state, 16
—, organic overloading, stability and performance during, 86
Reactor, diffusion-limited hollow fiber, for measurement of substrate diffusivities, 182
Reactor, enzyme membrane, L-leucine production in, 1616(C)
Reactor, fixed-film, for methane production from dairy manure, 266
Reactor, hollow-fiber, with flow swing, 1185
Reactor, immobilized cell
—, cell synchrony in, 1208
—, design and analysis, 932
—, experimental performance, 932
Reactor, rotating biological surface (RBS), alcohol fermentation in, 761
Reactor, ultrafiltration membrane, 1328
Reactor, upflow anaerobic, 800
Reactor, upflow anaerobic sludge bed (UASB), 1411, 1603(C), 1710
Recombinant DNA, unstable, product formation in, 1699
Recombinant plasmid pPL*c*23-*trpAI*, kinetic study of instability of, in *E. coli* using two-stage continuous culture system, 28
Recrystallization behavior of cellulose, 177
Redox potential, control of, 1512(C)
Repeated batch cultivation, 143
Resin, hydrophobic, use in steroid transformation, 825
Reverse osmosis, for separation of ethanol from ethanol–water mixture, 1081(C)
Rhizopus arrhizus, fumaric acid production by, improving rate of, 1067(C)
Rhizopus koji, ethanol fermentation of raw cassava starch with, 1270(C)
Rice straw, enzymatic hydrolysis of, 1418

Saccharification
—, enzymatic, of cellulose, effect of ethanol on, 389
—, enzymatic, of sallow, ultrafiltration membrane reactor for, 1328
—, enzymatic, of wheat straw, 650
—, straw, mutant of *Penicillium funiculosum* for, 81
Saccharomyces, performance of strains at high sugar concentrations, 1108
Saccharomyces cerevisiae
—, in continuous ethanol production from whey permeate, 914(C)
—, electrochemical control of pH of, 214(C)
—, immobilization of, by adhesion, 217
—, on sugar cane molasses, invertase activity of, 1229
Sallow, enzymatic saccharification of, 1328
Secodione, 17β-oxidoreduction to secol, 1347
Secol, 17β-oxidoreduction of secodione to, 1347
Serial propagation, on microcarriers, 1466
Shear, effect on enzyme complex, 1726(C), 1730
Shear stress effects, on cell cultures, 1021
Solka Floc BW 200, semicontinuous hydrolysis of, 1044
Spirulina, production of, 902(C)
Starch, hydrolysis of, by glucoamylase, 498
Starch, hydrolysis of, synergistic action of α-amylase and glucoamylase on, 260
Steric hindrance, in solid substrate fermentation of wheat straw, 1692
Steroid transformation, use of hydrophobic resin in, 825
Straw, saccharification of, 81
Streptomyces aureofaciens, hollow-fiber bioreactor for cultivation of, 1012
Streptomyces lincolnensis, lincomycin production and growth, effects of chemical environment on, 327
Styrene-malic anhydride, immobilization of carboxypeptidase on, 675
Substrate cycle system, amplification of, 132
—, single-enzyme, 132
—, two-enzyme, 133
Substrate diffusivities, measurement of, by diffusion-limited hollow fiber reactor, 182
Subtilisins, immobilized, in preparation of optically active D-arylglycines, 420
Sugar cane bagasse, hydrolysis of, by mycelial biomass of *Penicillium funiculosum*, 1070(C)
Sugar cane molasses
—, invertase activity of *Saccharomyces cerevisiae* on, 1229
—, stillage treatment with UASB reactor, 1710
Sugars, conversion of cellulose to, 980
Sugars other than glucose, fermentation equations for, 75
Sugars, reducing, effect of phosphate on estimation of, 1612(C)
Superfine filaments (SFF), knitted, for bioreactor, 1077(C)
Sweet potato, acid hydrolysis of, for ethanol fermentation, 316
Sweet sorghum, solid-state fermentation to ethanol, 34, 1123
Synchrony, cell, in immobilized cell reactor, 1208
Synthetic compounds, cometabolism in biological oxidation of, 1306

Tannase, comparison between soluble and immobilized for ester synthesis, 125
Temperature, effect of, on bioenergetics of algal cultures, 555
Thermomonospora
—, extracellular xylanases produced by, 832
—, β-Xylosidase of, 909(C)
Thiobacillus ferrooxidans, leaching of zinc sulfide concentrate by, 1173
D, L-Threonine, preparative resolution of, catalyzed by immobilized phosphatase, 247
s-Triazines, biological treatment of wastewater containing, 1291
Trichoderma harzianum, cellulase production by, effect of fermentation conditions on, 1385(C)
Trichoderma reesei
—, with *Aspergillus wentii*, cellulase and hemicellulase production by, 1353
—, cellobiase components of, for cellobiose hydrolysis, 463
—, cellulose degradation by, 1540
—, partitioning of cellulases from, 1036

Ultrasound, effect of, on insulin extraction, 1223
Unsteady-state sludge systems, calculation of mean cell residence time for, 695

Venturi aeration, for oil degradation, 94
Verroculogen, fermentation production of, 1586(C)

Wastewater
—, high strength, thermophilic anaerobic digestion of, 1374
—, *s*-triazine containing, biological treatment of, 91
—, upflow anaerobic sludge bed reactor (UASB) for treatment of, 1411
Water hyacinth, biogas production by, 905(C)
Wheat straw
—, alkaline treatment of, increased biodegradability by, 334, 345
—, optimization of solid substrate fermentation of, 20
—, pretreated, enzymic saccharification of, 650
—, solid substrate fermentation of, steric hindrance in, 1687
Whey, optimizing ethanol fermentation from, using computers, 547
Whey permeate, continuous ethanol production from, 914(C)
White-rot fungi, effect of gas environment on solid state fermentation of oat straw by, 382
Xanthomonas citri, enzymatic synthesis of cephalexin from, 953
Xylan hydrolysis, in acid hydrolysis of paper birch, 355
Xylanases, extracellular, produced by *Thermomonospora*, 832
Xylitol dehydrogenase, NAD-linked, in *Pachysolen tannophilus*, 302
Xylose, fermentation of, 171
D-Xylose, ethanol fermentation from, by *Kluyveromyces cellobiovorus*, 509
D-Xylose reductase, NADPH-linked, in *Pachysolen tannophilus*, 302
Xylose reductase, in *Pachysolen tannophilus*, 1739(C)
β-Xylosidase, of *Thermomonospora*, 909(C)

Yeast, ethanol tolerance of, extracellular acidification for testing of, 1596(C)

Zinc sulfide concentrate, leaching by *Thiobacillus ferrooxidans*, 1173
Zymomonas mobilis, ethanol fermentation by
—, continuous, from fructose, 613
—, filament formation, in packed-bed bioreactors, 626
—, mathematical model for, 984
—, preparation of cells for, 273
